The AI Bridge for India's Languages: Samvaad AI

SMART INDIA HACKATHON 2025

PROBLEM STATEMENT:-

- **A farmer in Odisha can't access healthcare because the app speaks only Hindi.**
- There are significant communication gaps in India due to its 22 official languages and more than 19,000 dialects.
- Current tools result in literal translations, which are frequently unclear and occasionally offensive.
- Business, healthcare, education, and governance are all hampered by poor communication.

SAMVAAD AI

IDEA/ SOLUTION :-

- Samvaad AI is an **AI-powered** platform for multilingual communication and cultural understanding in India.
- It goes beyond simple translation to capture tone, intent, and respect.
- It enables real-time multilingual chat.
- The platform includes a cultural sensitivity layer that explains language nuances.
- It supports both voice and text for accessibility.
- It is platform-agnostic, working on any device.
- The technology is built on datasets tuned for Indian languages and contexts.
- Its core purpose is to connect humans, not just translate

"Samvaad doesn't just translate. It connects humans."

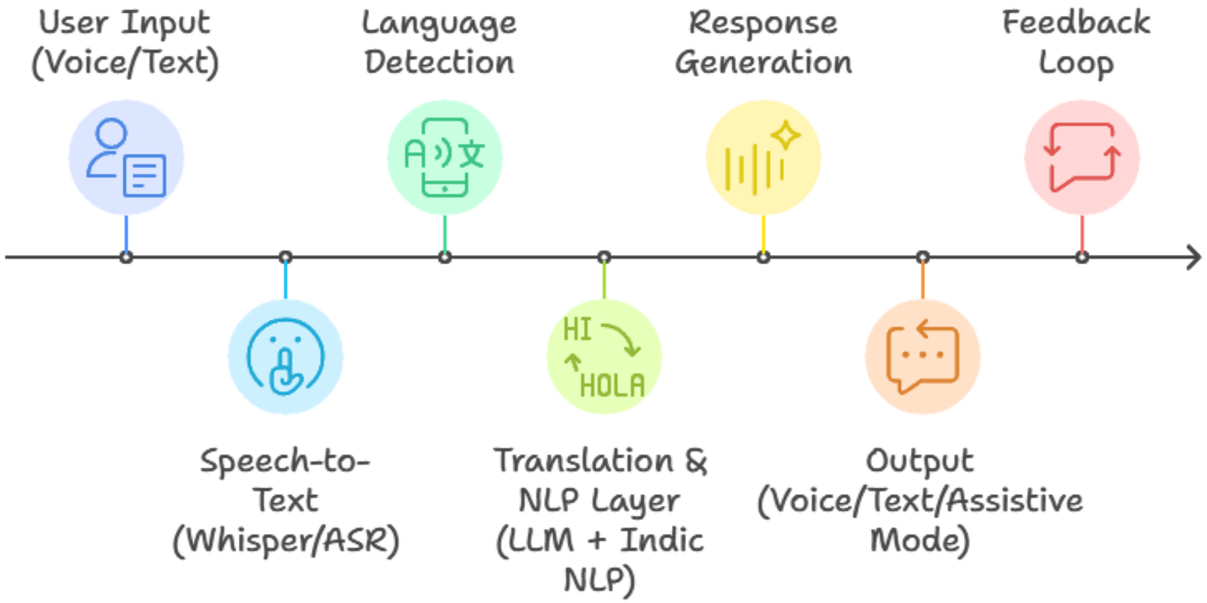

Culturally intelligent AI captures tone and intent beyond simple translation.
